Management System – Corporate Governance

We keep monitoring our corporate governance and strive to establish a governance system which is in line with the requirements of modern enterprise and appropriate for practical operations. We constantly update and improve governance methods in response to external changes and our internal needs, and coordinate for the full and balanced performance of all functions so as to promote our steady operations.

Corporate Governance

Our effective management system is the important guarantee for the company's balanced and sustainable development. The Group has established a management system which is in line with the management idea of the company and the actual situation.

Capital Structure

On 17 January 1999, a limited liability company, Shenzhen Zhong Baofu [1999] 22, established the Shenzhen Securities and Futures Office, the Group issued 12,000,000 A Shares of RMB1.00 each and 13,000,000 foreign shares of RMB1.00 each (hereinafter referred to as "B Shares") of RMB1.00 each. After the issue, the total capital of the Group was RMB89,000,000. The B Shares and A Shares of the Group were listed on the Shenzhen Stock Exchange on 23 March 1999 and 8 April 1999, respectively.

On 19 December 2012, the company was listed on the Shanghai Stock Exchange Regulated Company (CSRC) and the Stock Exchange of Hong Kong Limited (Stock Exchange), the Group's 1,300,509 B Shares were exchanged into 1,300,509 A Shares. The Main Board of the Stock Exchange of Hong Kong is the authorized listing place for the company's foreign shares, and the effective listing place of the company's foreign shares (hereinafter referred to as "H Shares"). With the listing on the CSRC and the Stock Exchange, the Group completed the listing of the H Shares on 31 December 2015 and issued a total of 286,096,100 H Shares at the price of HK\$13.8 each share.

As of 31 December 2017, the total issued capital of the Group was 2,982,889,136 shares, of which 1,266,312,527 shares were A Shares and 1,716,576,609 shares were H Shares.

Management System – Corporate Governance

Governance Structure

Under the Board, the entities are the Regional and Annual Committee, Strategic Committee, Audit Committee, Nominations Committee and the Risk Management Committee. In their respective spheres of competence, being the entities responsible for the discussion and decision-making about the company. We have also established a number of independent committees to ensure the effective and efficient operation of the Board.

In compliance with the requirements of the GSE, the effective and good governance of the company is led and controlled by the Board of Directors, decision-making of the Executive Committee, while the independent committees are established to ensure the effective and efficient operation of the Board.

Management System – Internal Risk Control and Audit

21

Safety and environmental protection risk prevention

Eni Internal Risk Control and Audit is a dedicated Group Risk Control and Audit function, which is designed to identify and assess risks to the Group's strategic objectives and to ensure that the Group's risk management processes are effective and efficient.

Management System – Internal Risk Control and Audit

22

A few of the key areas of internal control
and audit activities include the handling of
the 1,000 full-time staff in the plant and
the plant's operating head offices, all of which
are subject to a regular and independent
audit of the general and effective internal control
of the plant's operations. The handling of
internal control activities is a direct result of
the plant's internal control and internal
audit activities, which are based on efficiency
and key performance indicators. We do have
accounted for the internal control
activities.

Management System – Information Disclosure and Investor Relations Management

Information Disclosure and Investor Relations Management

Management System – Social Responsibility Management

We have identified four material issues which are high risk like corruption, community relations, product quality, product health and safety and anti-collusion. Each of these material issues are disclosed in the report. The full list of applicable corporate risk categories and the corresponding indicators of these material issues are as follows.

Material Topics	Internal	External	Corresponding section in this report
Community Relations	√	√	Risk Management and Audit
Product Quality	√	√	Achievement of CSR Goals
Product Health and Safety	√	√	Achievement of CSR Goals
Anti-collusion	√	√	Financial

Management System – Social Responsibility Management

Topics concerned	Feedback from stakeholders	Response from the Group	Corresponding SDGs of the United Nations
Occupational health and safety	Employees can be seen to be	The Group has established a HSE management system to be certified by the relevant authorities and OHSAS18001 certification. All employees have received the necessary specific training and education. The Group has established a safety committee to monitor and improve the safety performance of the company. The safety committee is responsible for building the safety culture of the company.	<p>3 GOOD HEALTH AND WELL-BEING</p>
The right to freedom of expression	Need to safeguard the right to freedom of expression, including the right to a safe and healthy working environment	We have established channels for staff feedback and hold regular meetings with employees to address their concerns and improve the working environment.	<p>8 DECENT WORK AND ECONOMIC GROWTH</p>
Product Responsibility	Product safety and quality are the company's core business	The Group has established a dedicated Legal Affairs Department to ensure the product safety and quality of the company.	<p>12 RESPONSIBLE CONSUMPTION AND PRODUCTION</p>

Win-win Cooperation

The Global Partnership for Education (GPE) is a multi-donor trust fund established in 2015 to support low- and middle-income countries in their efforts to improve the quality and access to education. As of 31 December 2017, the GPE has a total of 6,215 million USD in commitments from 111 countries.

Fulfilling Social Responsibility – Win-win Cooperation

Promoting Sound Industrial Development

As a leader in the industry, we shall abide by industry standards and actively participate in the development of industry standards. By the end of 2017, we had been involved in 150 industry standards across anfield industrial categories, special vehicles, equipment & chemical engineering facilities, 60 of which (industry standards) had been officially published.

In 2017, the Group's major changes followed the establishment of a new ISO industry standard ISO1161:2016 Series 1 Eight C Categories C and the media's Frigate. The industry standard GB/T 3357-2017 Catalog of Eight C Categories Manufacturing Serial Number, which has been officially published by the Standardization Administration of the PRC. The Revision of the Final Product Technical Specifications of the Group's major products has been added to the Group's standardization system. The Group's major products will be officially published.

The Vehicle Segment of the Group actively participated in the standardization work of the Eight Tail Series Pedigree, Safety Specifications of P-type Vehicle Operation Road, Major Vehicle and Tailor-made and Real-time Protection Device and the industry standard, which will be officially published in the near future.

The equipment and chemical segments of the Group actively participated in the standardization work of 16 industry standards and 19 industry standards in the field of heavy machinery, industrial lifting machinery, C-classes of Vehicle, Road Trucks of Refrigerated Lifting Gantry and Sea Lifting Steel Tube Large Volume C-classes. Diving equipment, Lifting Machinery Gantry of Vehicle, Series 1 Eight C Categories Specifications and Towing Truck Categories of Lifting Gantry and P-type Diving, Road Trucks of Refrigerated Lifting Gantry and the industry standard will be officially published.

Fulfilling Social Responsibility – Environment Protection and Conservation

Following the Green Lead of the China Chemical Industry Association (CCIA) Self-Discipline Code in 2016, under the leadership of the Group, we have implemented a series of measures to reduce VOC emissions. In 2017, the Group fulfilled its obligations under the China Chemical Industry Association Self-Discipline Code and achieved a 10% reduction in VOC emissions. In 2017, 10 days of production were suspended to reduce VOC emissions. The Group has also implemented a series of measures to reduce VOC emissions, such as the use of low-VOC raw materials and the adoption of advanced production technologies. The Group has also implemented a series of measures to reduce VOC emissions, such as the use of low-VOC raw materials and the adoption of advanced production technologies.

Case Study Intelligent Electrocoat Technology for Vehicle Segmentation

In order to reduce the environmental impact of VOC emissions, we have adopted intelligent electrocoat technology for vehicle segmentation. This technology uses a highly efficient electrocoat system to reduce VOC emissions. The Group has also implemented a series of measures to reduce VOC emissions, such as the use of low-VOC raw materials and the adoption of advanced production technologies. The Group has also implemented a series of measures to reduce VOC emissions, such as the use of low-VOC raw materials and the adoption of advanced production technologies.

Case Study Reduction of VOC Emissions in the Production of Vehicle Segmentation

The Southern CIMC (Southern CIMC), as a member of the Green Lead of the China Chemical Industry Association, has implemented a series of measures to reduce VOC emissions in the production of vehicle segmentation. The Group has also implemented a series of measures to reduce VOC emissions, such as the use of low-VOC raw materials and the adoption of advanced production technologies. The Group has also implemented a series of measures to reduce VOC emissions, such as the use of low-VOC raw materials and the adoption of advanced production technologies.

Since 2017, the VOC Group Self-Discipline Code has been implemented. All chemical products in the China Chemical Industry Association Self-Discipline Code have been reduced by 60%-70%, which has effectively reduced the environmental impact. The Group has also implemented a series of measures to reduce VOC emissions, such as the use of low-VOC raw materials and the adoption of advanced production technologies. The Group has also implemented a series of measures to reduce VOC emissions, such as the use of low-VOC raw materials and the adoption of advanced production technologies.

Fulfilling Social Responsibility – Environment Protection and Conservation

Waste water Treatment

The Group has always been committed to environmental protection and social responsibility. We have established a comprehensive waste water treatment system. In 2017, the Group invested RMB15,000 million in waste water treatment projects.

Resources Conservation

The Group has always attached great importance to resource conservation. In 2017, the Group invested RMB1208,000 million in resource conservation projects, including electricity, water, and gas.

In 2017, the Group's electricity consumption was 6,208,000 kWh, an increase of 65% from 2016. The Group's water consumption was 197,700 m³, a decrease of 23% from 2016. The Group's gas consumption was 12%, a decrease of 12% from 2016.

We have also held the Green Energy Conference and the 1-Carbon Club Initiative. In 2017, we implemented the Green Energy Initiative in the Vehicle Segment, Financial Segment, and Chemical Segment. We have also implemented the Green Energy Initiative in the Vehicle Segment, Financial Segment, and Chemical Segment. We have also implemented the Green Energy Initiative in the Vehicle Segment, Financial Segment, and Chemical Segment.

Case Study: Teaed Tea Canteen in the Vehicle Segment

During 2017, CIMC Special Vehicle Company has introduced and adopted the tea canteen in the tea canteen effectively. The tea canteen is a green IV tea canteen. The tea canteen is a green IV tea canteen. The tea canteen is a green IV tea canteen.

Case Study: Waste Tea Facility in the Energy and Chemical Segment

In 2017, a waste tea facility has been established in the energy and chemical segment. The waste tea facility is a green IV waste tea facility. The waste tea facility is a green IV waste tea facility. The waste tea facility is a green IV waste tea facility.

Fulfilling Social Responsibility – Production Safety

Occupational Health Management

The Group is committed to ensuring the safety and health of its employees. All employees have the right to a safe and healthy working environment. The Group has established a comprehensive occupational health and safety management system to identify, assess, and control occupational hazards. This system includes regular safety training, hazard identification, and the use of personal protective equipment (PPE). The Group also provides first aid facilities and maintains a safe working environment.

Regular Promotion of Occupational Health

The Group regularly promotes occupational health and safety through various activities. These include safety training sessions, safety drills, and the distribution of safety materials. The Group also encourages employees to report safety hazards and incidents. By promoting occupational health and safety, the Group aims to reduce the risk of accidents and injuries, ensuring a safe and healthy working environment for all employees.

Case Study: TLC, Laguni, Cee, and Opre Training Activities and Caring for the Well-being of People in the Yağzh City

In November 2017, Yağzh City, Bursa, Turkey, held a series of training activities to promote occupational health and safety. The activities were organized by the Bursa Chamber of Commerce and Industry (BCCIC) in cooperation with the Bursa Occupational Health and Safety Association (BOSHA). The training activities included safety training, safety drills, and the distribution of safety materials. The training activities were held in the Yağzh City Training Center. The training activities were held for the employees of the Bursa Chamber of Commerce and Industry (BCCIC). The training activities were held for the employees of the Bursa Chamber of Commerce and Industry (BCCIC). The training activities were held for the employees of the Bursa Chamber of Commerce and Industry (BCCIC).

Fulfilling Social Responsibility – Production Safety

Addressing Problems at the Source: Reducing On-Site Occupational Hazards

The Group has been committed to addressing occupational safety and health issues, particularly in the areas of machinery safety, ergonomics, and the use of personal protective equipment (PPE). The Group has implemented various measures to reduce on-site occupational hazards, including the use of safety barriers, safety interlocks, and safety training for employees.

Case Study | The use of PPE in a Cutting Machine Dedicated to CNC Safety

The company has achieved a 87% reduction in occupational accidents and a 98% reduction in lost time due to occupational accidents.

Case Study | The use of PPE in a Head Assembly Process

The company has achieved a 100% reduction in occupational accidents and a 100% reduction in lost time due to occupational accidents.

Fulfilling Social Responsibility – Production Safety

Building a Safety Culture

Through the establishment of a safety culture, we can significantly reduce the number of accidents and ensure the health and safety of our employees. Safety is the foundation of our business, and we are committed to creating a safe working environment for all our employees.

Case Study Jigong Heavy Industry Group KYTC Competition

In October 2017, Jigong Heavy Industry Group held the first KYTC competition. The event took place in the factory. It was a very successful one. About 400 employees participated. The competition was held in a large hall. The KYTC competition was held in a large hall. The KYTC competition was held in a large hall.

Case Study C&T Jigong Safety Production Month Knowledge Competition

For the first time in 2017, National Safety Month was held. The competition was held in a large hall. The competition was held in a large hall. The competition was held in a large hall.

Fulfilling Social Responsibility – Harmonious Labour Relations

Harmonious Labour Relations

We adhere to the people-oriented philosophy and insist on guaranteeing employee's interests, creation of a harmonious work atmosphere and leading employee's progress to ensure a safe and healthy work environment and achieve the common cause with employee.

We believe that the company should create a harmonious work atmosphere and leading employee's progress to ensure a safe and healthy work environment and achieve the common cause with employee.

Fulfilling Social Responsibility – Harmonious Labour Relations

Respect Human Rights

The Group is committed to upholding human rights and labour standards and policies in all its operations and business relationships. The Group has a policy on human rights and labour standards, which is based on the principles of respect for human rights and labour standards. We are committed to ensuring that our operations and business relationships are in full compliance with all applicable laws and regulations, and that we do not engage in any activities that would violate human rights or labour standards. We are committed to ensuring that our operations and business relationships are in full compliance with all applicable laws and regulations, and that we do not engage in any activities that would violate human rights or labour standards.

Policies and measures of the Group

Prohibition of child labour	The Group is committed to ensuring that no child labour is employed in any of its operations or business relationships. The Group has a policy on child labour, which is based on the principles of respect for human rights and labour standards. We are committed to ensuring that our operations and business relationships are in full compliance with all applicable laws and regulations, and that we do not engage in any activities that would violate human rights or labour standards.
Prohibition of forced labour	The Group is committed to ensuring that no forced labour is employed in any of its operations or business relationships. The Group has a policy on forced labour, which is based on the principles of respect for human rights and labour standards. We are committed to ensuring that our operations and business relationships are in full compliance with all applicable laws and regulations, and that we do not engage in any activities that would violate human rights or labour standards.
Equal employment	The Group is committed to ensuring that all employees are treated equally and fairly, regardless of their race, gender, age, education, or ability. The Group has a policy on equal employment, which is based on the principles of respect for human rights and labour standards. Fulfilling Social Responsibility – Harmonious Labour Relations

Employee Training & Development

We firmly believe that talent is the building block of CIMC. The Group actively invests in human capital-like growth and, consequently, invests in employee development. All employees are encouraged to take advantage of their own talents, and the Group provides a wide range of self-help and professional development courses. The Group also provides a wide range of professional development courses, including English, IT, and other courses. All employees are encouraged to take advantage of their own talents, and the Group provides a wide range of self-help and professional development courses. We also provide a wide range of professional development courses, including English, IT, and other courses.

Fulfilling Social Responsibility – Harmonious Labour Relations

Communication with and Care for Employees

The Group attaches great importance to the communication with employees, especially for the long-term employees. We have established diversified channels for communication and a regular feedback and effective communication mechanism. We encourage all employees to report any irregularities in the work. The communication channels have established a diversified and effective communication mechanism.

Face-to-face meeting with and assistance for new comers

Central and regional management attaches great importance to the communication with new employees. The Group has established a regular communication mechanism for new employees, including face-to-face meetings, guidance, and assistance, to help them quickly adapt to the work environment.

Face-to-face work meeting

Effective face-to-face communication is the key to the implementation of the Group's strategy. The Group has established a regular face-to-face communication mechanism, including work meetings, to ensure the timely communication and implementation of the Group's strategy.

Employee communication committee

A communication committee has been established on the basis of the Group's communication policy. The committee is responsible for the communication and feedback of employees, and it is an important channel for the communication between employees and management.

Complaints and statement of employees

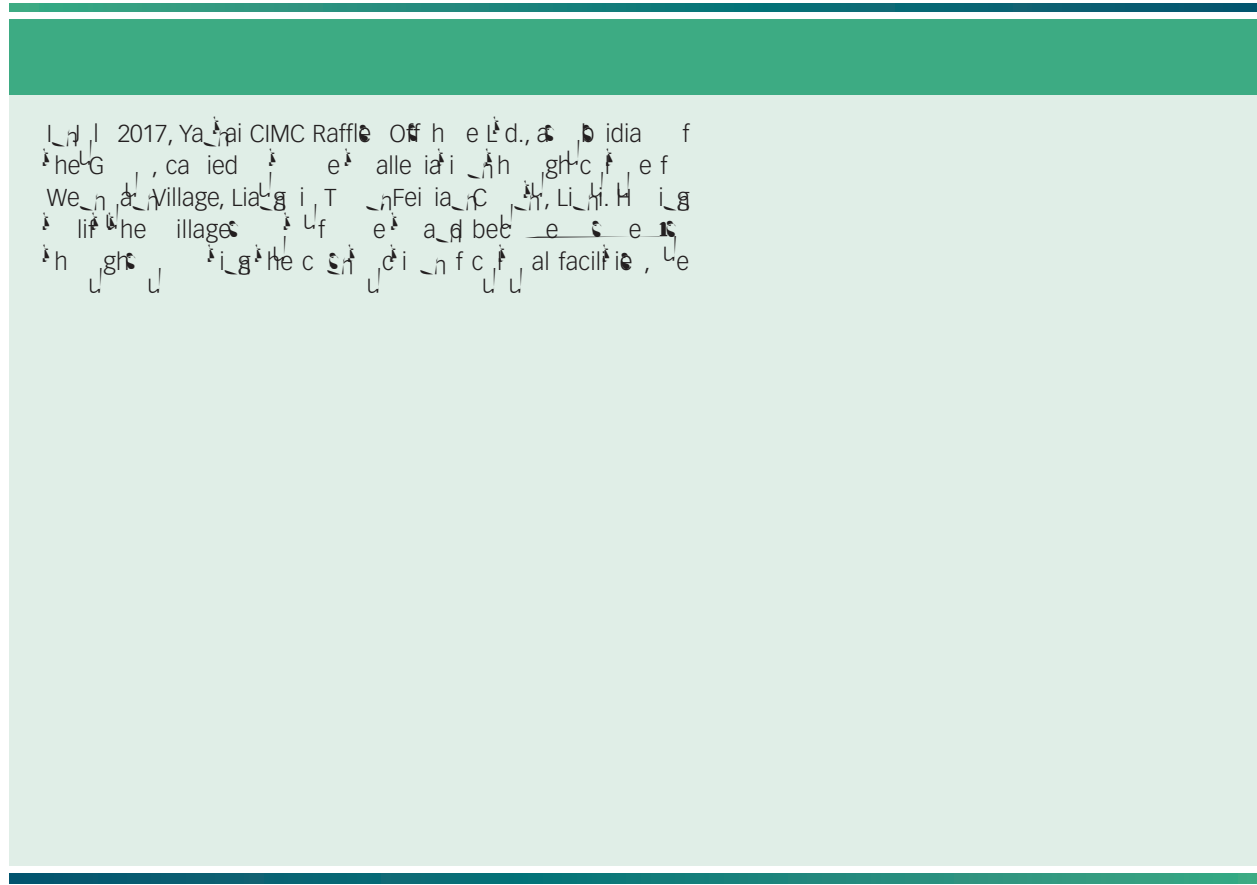

The Group has established a complaint and statement mechanism for employees. Employees can report any irregularities in the work through the communication channels. The Group will handle the complaints and statements in a timely and effective manner.

Community Engagement and Development

CIMC and the Beijing Municipal Government have jointly established the Beijing Municipal Charity Foundation (BMC) to support the development of the Beijing Municipal Charity Foundation (BMC) and to support the development of the Beijing Municipal Charity Foundation (BMC). While aiming to help the development of the Beijing Municipal Charity Foundation (BMC), the BMC has also been committed to the development of the Beijing Municipal Charity Foundation (BMC). In 2017, the BMC donated RMB2,592 million to support the development of the Beijing Municipal Charity Foundation (BMC) and to support the development of the Beijing Municipal Charity Foundation (BMC).

People's Daily, the largest newspaper in China, reported that the BMC has been established in Beijing. The BMC is a non-profit organization that will focus on supporting the development of the Beijing Municipal Charity Foundation (BMC) and to support the development of the Beijing Municipal Charity Foundation (BMC). The BMC will also be committed to the development of the Beijing Municipal Charity Foundation (BMC) and to support the development of the Beijing Municipal Charity Foundation (BMC). We will hold charitable events to help the development of the Beijing Municipal Charity Foundation (BMC) and to support the development of the Beijing Municipal Charity Foundation (BMC).

Outlook – Risks and Challenges

We weigh up the situation and think carefully about every step in the future. By controlling risks and grasping opportunities, we formulate a detailed plan to integrate the fulfilment of social responsibilities with corporate and social sustainable development.

Risks and Challenges

The global political and economic scenario remain largely in the early stage

Over the past few years, the United States, the European Union, and the Belt and Road Initiative have been the main drivers of global economic growth. The Federal Reserve's monetary policy has become a key factor in the US dollar's value, and the effects of the Fed's policy on the global balance of payments will be significant. The European Union will continue to be a major economic power, and the UK's departure from the EU will have a significant impact on the global economy. The Middle East and the Korean Peninsula will continue to be major areas of global balance of payments in 2018.

China has entered the stage of high quality growth, making it imperative to upgrade the conventional manufacturing

As the 19th National Congress of the Communist Party of China, a clear goal has been set for China to enter the stage of high quality growth. The goal is to upgrade the conventional manufacturing industry and to develop high-end manufacturing. This will require significant investment in research and development, and in the training of high-quality talent. The government has already taken a number of measures to support this goal, including increasing the R&D tax credit, and providing financial support for high-tech enterprises. It is expected that China will continue to be a major driver of global economic growth in the coming years.

Outlook – Future Initiatives and Plan

71

Future Initiatives and Plan

In 2018, the Group will continue to focus on the following strategic initiatives: first, to further expand the global network of container lines; second, to strengthen the core business of container leasing and related services; and third, to explore new business opportunities in the field of intelligent logistics, finance and other areas.
